

HARBOR COMMITTEE MEETING – August 21, 2014

Members present were John Chipman, Chris Urquhart, Jason Follette, Amos Kelly, and Brad Vassey.

Members expressed satisfaction with the groundwork projects in PH and SG. The wood for the SG pier is due from Viking in 2-weeks. Access to the SG breakwater will be restricted until the pier is built. The hoist will be installed upon completion of the pier. A ladder will be used for access to the pier until a gangway and float are available. Conduit for the electric wire has been buried in the center of breakwater.

Members recommended that 16 additional concrete planks be installed to complete restoration of the boat ramp in Bunkers Harbor.

Members recommended that the old gangway obstructing parking at the SG breakwater be sold for \$1000.00, and the money be applied to the future gangway/float.

Brad Vassey
