

## Minutes for Shellfish Meeting September 14, 2016

1. Meeting called to order by Michael Pinkham SFW
2. Approval of Minutes from July 13, 2016 Meeting-  
Motion made to accept by PJ-2<sup>nd</sup> by Dave Deniger—2 voted in favor with 1 abstention
3. Presentation by Dan Curtis Shellfish Committee Chairman from Steuben regarding the goose population ----Steuben has contracted with USDA to remove geese-they were charged approx. \$1200.00 for removal and Steuben is asking if Gouldsboro would like to split the cost-because if they move the geese along they will move to Gouldsboro-they worked the town line between the two towns, they also got some pyrotechnics to move the geese along-Steuben is also looking into amending their animal control laws where it would be illegal to feed geese-they are also applying for a permit for removal and lethal hinting if needed for next year, hopefully the pyrotechnics would make the m move on----John Keenan questioned the effect of the fireworks on the geese if it really bothered them and if the flats and the water was really polluted-he continued on for a while –the last option was next July to use a net when they are molting round the geese up with the help of the USDA---the question is the Town Of Gouldsboro interested in Splitting the bill with Steuben for the work that has already been done----  
Motion made by David Deniger 2<sup>nd</sup> by PJ-Vote taken 2 in favor 1 abstention
4. Predator Net Removal on October 2<sup>nd</sup> @ 0600 hours Sunday—We need a big crew to break up into teams to get them all in one tide  
Motion made by Dave Deniger 2<sup>nd</sup> by PJ-Vote taken 2 voted in favor - 1 abstention—meet across from Young’s at 0600 with disperse from there
5. Rain Gauge –(Washington County got a Grant) there grant had to meet specs for Forestry— the gauge helps in the event of a rainfall closure Nearest to us is at the Trenton Airport—the cost for the rain gauge is \$701.99 once it is hooked and we set up an account with weather underground DMR can track our rainfall—think it has to be recalibrated

every 3 years, Mike explained the benefits of having our own gauge-- Mike will ask IT gut if it can be hooked so diggers can check it---

Motion made by David Deniger to go to Selectmen for approval 2<sup>nd</sup> by PJ-Vote taken 2 in favor-1 abstention

6. Green crab project those involved have caught a lot
7. Box Project John Small Cove to be picked up in late October
8. John Small Cove mud turn over with a worm hoe up in the cove-this would give the clams a chance to grow
9. State Closures Bunker-Taft—the 2 pipes located by the Sie Ledges in South Gouldsboro were cleared as not a pollution source—it might be able to be opened—the pipe on Taft Point was cleared as not a problem –area could be open in a week or so
10. Next Meeting October 12, 2016
11. Motion to adjourn at 7:05 PM by Dave Deniger 2<sup>nd</sup> by PJ- 2 voted in favor 1 abstention
